Technical Information

Product Code B008

## **BRICK AND MASONRY CLEANER**

BRICK AND MASONRY CLEANER is a concentrated acidic cleaner and descaler with deep penetrating action, that can be used for the fast and effective cleaning of concrete slabs, bricks, paving stones and other surfaces. It is ideal for removing mortar stains, limescale deposits and light rusting from masonry surfaces, metals, plastics, glass, etc.

BRICK AND MASONRY CLEANER may also be used for the removal of concrete and mortar residues from building equipment, concrete mixers and tools, and for the descaling of boilers, heat exchangers, water tanks and pipework.

### **ACIDIC CLEANER AND DESCALER**

**FAST ACTING**

**DEEP PENETRATING**

**TIME SAVING**

### **DIRECTIONS FOR USE**

BRICK AND MASONRY CLEANER may be used as supplied or diluted with water depending on the deposits to be removed.

The surface to be cleaned should be wet with water before application of BRICK AND MASONRY CLEANER. Apply the solution by brush, mop or by low pressure spraying. If necessary agitate the surface with a brush. When the deposits have been removed the surface should be rinsed with water. Repeat the process for stubborn deposits.

Small items such as tools may be immersed in the solution. The internal surfaces of boilers, tanks and pipework should be soaked in solution until all deposits are removed. Rinse thoroughly with water to remove all residues of the acid.
