Technical Information

Product Code D003

## **DEGREASER - R.T.U** EMULSIFIABLE SOLVENT

DEGREASER (R.T.U) is an emulsifiable solvent cleaner that can be used for degreasing engines, gearboxes, vehicle suspension and chassis parts, machinery, flat or formed sheet steel, small metal components, etc.

The solvents in DEGREASER (R.T.U) are selected to rapidly penetrate and loosen oily and greasy soiling and deposits. Degreaser (RTU) contains detergents that enable the deposits to be emulsified and rinsed off with water.

### **READY TO USE**

### **RAPIDLY PENETRATES SOILING AND DEPOSITS**

### **RINSES AWAY WITH WATER**

### **DIRECTIONS FOR USE**

DEGREASER (R.T.U) may be used as supplied, or may be diluted with up to 2 parts commercial paraffin or kerosene. It is designed to be used at room temperature and must NOT be heated.

DEGREASER (RTU) may be applied by brushing or low pressure spraying. Allow the solvent to soak into the contamination on the components for about 10 minutes. The loosened soiling may then be hosed off with water or removed using a pressure washer.

Alternately the soiled components may be immersed and soaked in DEGREASER (RTU) contained in a suitable tank or receptacle. After removal allow excess liquid on the parts to drain back into the tank before washing with water.

Heavily soiled parts may require agitation or brushing to aid penetration and loosening of the contamination.
