Technical Information

Product Code G001

GLUE REMOVER

GLUE REMOVER is a powerful solvent cleaner used for softening and removing glue from tools and applicators, and for cleaning excess glue and residues from surfaces. May also be used for cleaning surfaces prior to the application of glue. GLUE REMOVER is effective on most types of rubber based or synthetic resin glues. It may not be effective on some water or spirit based glues.

POWERFUL SOLVENT

FAST DRYING

QUICK AND EASY TO USE

DIRECTIONS FOR USE

Always try the GLUE REMOVER on a small area first, to test for compatibility or adverse reaction.

Use in a well ventilated area or provide localised extraction of the solvent vapour.

Apply GLUE REMOVER to affected areas using a soft cloth, and allow time for solvent to soften the glue. Agitate gently to aid penetration and removal of the glue, and wipe away the softened glue with a clean cloth

Wear suitable solvent resistant gloves to prevent contact of GLUE REMOVER with skin.
