Technical Information

Product Code R009

REPEL HYDROPHOBIC GLASS TREATMENT

REPEL Glass Treatment is a ready-to-use water based treatment for all types of glass surfaces. Its hydrophobic properties actively repels water and protects against resoiling. Suitable for use upon glass windows, mirrors, conservatories, shower screens, etc.

Once applied, surfaces may be cleaned as usual and as required using mild cleaning products. Do not use harsh chemicals or solvents as these may adversely affect coating life and performance.

DIRECTIONS FOR USE

Use REPEL as supplied, do not dilute. Ensure surfaces are clean and dry. Spray REPEL evenly and sparingly onto the surface. With a soft applicator such as a sponge, mop or cloth, work the product into the surface using a circular motion. Make sure all areas covered and then allow the product to dry. Once dry, buff with a clean soft cloth or similar.
