Technical Information

Product Code S010

## **STRIPEX** IMMERSION PAINT STRIPPER

STRIPEX is a powerful acid activated cold immersion paint stripper capable of removing most types of paint and polymer coatings. It is safe to use on many metals but may attack the surface of some aluminium, zinc and magnesium alloys.

**EASY TO USE AND FAST ACTING**

**EFFECTIVE ON MOST PAINTS**

**SAFE ON MANY METALS**

### **DIRECTIONS FOR USE**

Use as supplied in a suitable soak tank deep enough to fully immerse the components to be stripped.

A water seal (2-inch minimum) will reduce solvent evaporation.

STRIPEX must not be heated or agitated.

Components should be immersed until paint is softened, wrinkled or flaked. After treatment, pressure rinse to remove residues and neutralise any remaining STRIPEX.
