

Technical Information

Product Code S013

## **SURE CLEAN TRAFFIC FILM REMOVER**

SURE CLEAN is a specially formulated concentrated traffic film remover, intended for use in pressure washing equipment. It effectively cleans vehicle bodies, cabs, trailers, coaches, caravans etc. and is also suitable for cleaning chassis, engines, heavy plant, and machinery. It may also be used as a hard surface cleaner in industry and in food processing areas.

**CLEANS PAINTWORK AND CHASSIS**

**LABOUR SAVING AND FAST ACTING**

**ECONOMICAL IN USE**

### **DIRECTIONS FOR USE**

#### *Vehicle Cleaning:*

To prevent streaking the vehicle should be wetted prior to application of SURE CLEAN.

Hot and cold water pressure washing equipment should be operated in accordance with the manufacturer instructions, taking particular heed of any safety advice. Adjust the machine chemical control to give about 1% dilution at the lance, if necessary diluting the SURE CLEAN with up to 4 parts water in the chemical tank. Apply SURE CLEAN evenly over the surface, covering convenient sections at a time and working from the lower section upwards. Allow time for the product to penetrate and then pressure wash to remove the loosened grease and dirt. Rinse thoroughly with clean water to remove all residues of SURE CLEAN from the surfaces. Do not allow chemical to dry on paint work.

#### *Hard Surface Cleaning:*

For hard surface cleaning and washing down paint work, etc. use 1 part SURE CLEAN with up to 40 parts hot water, depending on the soiling to be removed. Apply solution with a brush, mop or cloth, and rinse off with clean water.
