Technical Information

Product Code T012, T015

TIMBER TREATMENT CONCENTRATE (LARCH GOLD, NUT BROWN)

A water based concentrated timber treatment, which requires dilution with water before use. Available in two colours Nut Brown T012, and Larch Gold T015. Solution will impart attractive colours to sawn timber fence panels, garden furniture and sheds etc.

DIRECTIONS FOR USE

IMPORTANT Timber should be dry (Water content less than 28%), de-barked and free of surface contamination before dipping.

Mix 1 part TIMBER TREATMENT CONCENTRATE with up to 20 parts clean water to produce a standard colour. Stronger colours may be produced by using more concentrate, but it is not recommended to dilute greater than 1 part to 20 parts.

Dip panels in solution and allow time for stain to penetrate the timber (10 minutes recommended). Drain panels, and allow to dry completely before exposure to rain and weathering.
