Technical Information

Product Code T016

TIMBER TREATMENT SPECIAL 50 : 1

A water based timber treatment that requires dilution with water before use. Solution will impart attractive colours to sawn timber fence panels, garden furniture, sheds and trellis, etc.

Additional fungicide may be required when used on low quality timber or for adverse storage conditions.

DIRECTIONS FOR USE

IMPORTANT Timber should be dry (Water content less than 28%), debarked and free of surface contamination before dipping.

Mix 1 part SPECIAL 50 : 1 with up to 50 parts clean water to produce a standard colour.

Dip panels in solution for as long as possible and allow time for stain to penetrate the timber (10 minutes recommended). Drain panels, and allow to dry completely before exposure to rain and weathering.
